Supersedes AFI 33-115, SMC Supplement 1,
dated 30 Sept 00

Certified by: 61CS/SCB (Major Terri Centner)
Pages: 2
Distribution: F

This instruction supplements Air Force Instruction (AFI) 33-115, 15 November 02. This supplement describes SMC's procedures for use in conjunction with the basic AFI and AFSPC policies and procedures. This supplement is applicable to all SMC organizations and other organizations located on Los Angeles AFB CA or supported by SMC in the Los Angeles Area. SMC publications and forms are kept in a backup repository on <http://intranet.losangeles.af.mil/61ABG/61CS/SMCPDL/>.

SUMMARY OF REVISIONS

This revision removed paragraphs 6.4.2.2., and 6.4.2.4. and removed paragraphs 3.1.1.2.1.1, 3.1.2.1.6, 6.4.2.5, 6.4.2.9, 6.4.3.1.11, 6.4.3.1.14, 6.4.3.1.1.6, 6.4.4.3, and 6.4.4.4.

3.1.2.1.5. The Network Security Manager and Network Security Officer (NSM/NSO) perform Functional Systems Administrator (FSA) functions at Los Angeles AFB.

6.4.2.1. IP address management may be shared between the NCC and Functional System Administrator (FSA). IP address management is distributed; NCC assigns blocks of IP addresses to each supported organization.

6.4.2.1.1. System Program Office (SPO). Network Control Center (NCC) assigns IP ranges to SPO FSAs. SPOs must provide copies of their Dynamic Host Configuration Protocol (DHCP) databases to the NCC. SPOs manage and assign IP addresses to their network devices. DHCP server databases and logs and static IP address databases must be provided to NCC so that NCC can rapidly identify and troubleshoot network problems. Sharing of network management responsibilities will be permitted only under the terms of a Service Level Agreement (SLA).

6.4.2.2. Domain Name System management may be shared between server administrators and FSA.

6.4.2.4. The NCC provides remote dial-in service and account maintenance for staff users, and SPO Remote Access Server (RAS) administrators perform their own account maintenance.

STEPHEN W. STARKS, Lt Col, USAF
Commander
